When international, state, county, and/or MCD/CD boundaries coincide, the map shows the boundary symbol for only the highest ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

1. A " " following an MCD name denotes a State MCD. A " " following a place name indicates that the MCD coincides with the same census and FIPS code as the place; the State MCD is not shown.

2. The label name corresponds to the place ID code.

3. Census tracts are identified by an up to four-digit integer number and may have an optional five digit suffix. For example, 14-7025. The census tract number consists of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros and trailing zeros for census tracts without a suffix. The last number examples above would have codes of 062300 and 147025, respectively.

4. The up to four digits are used to identify the census tract and may vary from the standard four-digit format.

5. The label name corresponds to the place ID code.

Show to open boundaries, some road names, along with other features and geographic names on this map may not be shown.

SYMBOL DESCRIPTION	SYMBOL
When international, state, county, and/or MCD/CD boundaries coincide, the map shows the boundary symbol for only the highest ranking of these boundaries.	
Geographic area names are followed by their FIPS or census code.	
1. A " " following an MCD name denotes a State MCD. A " " following a place name indicates that the MCD coincides with the same census and FIPS code or the place the State MCD label is not shown.	
2. If the label refers to the other fill color.	
3. Census tracts are identified by an up to four-digit integer number and may have an optional five digit suffix. For example 15167.02. The integer may include county or six digit with an optional decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros and trailing zeros for census tracts without a suffix. The final number example above would have codes of 02000 and 16702, respectively.	
Other types (boundaries, water road names, along with other features and geographic names on the map, may not be shown).
